JavaScript React CSS3

HTML5

Responsive Web Design

Node.js Express.js Git

MongoDB RESTful APIs

Soft Skills

Utkarsh Singhal

Full Stack Web Developer

Professional Summary

Results-driven Full Stack Web Developer with expertise in JavaScript and the MERN stack. Collaborative problem solver with a strong attention to detail. Proficient in developing efficient server-side APIs using Node.js and Express.js and creating optimized database models and queries using MongoDB. Skilled in frontend development with React.js, ensuring seamless integration between frontend and backend components. Continuously staying up-to-date with the latest web development trends and technologies to enhance the development process.

Projects

Meesho Clone [Live Demo Link](#) [Github Repo Link](#)

React Redux Chart.js Cyclic Vercel CSS

Chakra UI

- Developed a clone of the Meesho website, an online marketplace for individuals and small businesses to sell products through social media channels.
- Implemented email and password validation in the signup and login forms.
- Utilized React, Redux, Chart.js, Cyclic, Vercel, CSS, and Chakra UI for the tech stack.
- Built an expandable and shrinkable side navbar for improved navigation.
- Responsible for building the admin section, enabling addition, deletion, and editing of new travel destinations.
- Enhanced the Payment Page and implemented proper product tracking using Chart.js and Redux.
- Incorporated features like filter and sorting by rate and star ratings for a better user experience.

- Developed and maintained various key features for a travel website, including the Home Page, Flight Page, Login-in and Sign-up Page, Hotel Search, Flight Search, Listings for various destinations and hotels, an Admin Section, and introduced a new Car Rental feature, with a focus on seamless Payment processing.
- Built the admin section, enabling the addition, deletion, and editing of new travel destinations.
- Enhanced the car rental feature, implementing proper product tracking using Chart.js and Redux for comprehensive data visualization.
- Implemented features like filter and sorting by rate and star ratings.
- Worked with technologies such as React, Redux, chart.js, Chakra UI, JavaScript, and JSON-Server.

Tracking Time [Live Demo Link](#) [Github Repo Link](#)

HTML

CSS

JavaScript

- Our Tracking Time project is a beginner-level project that provides time tracking services to businesses
- It is built using HTML, CSS, and JavaScript, making it suitable for a Full Stack Web Developer role
- The project features a user authentication system, allowing users to securely sign in and access personalized content
- Another key feature is the intuitive time-tracking tool, which helps users monitor their work and analyze their productivity
- We have also integrated a blogging and work history feature, allowing users to document their professional journey and share insights with others
